

“ITP Photocatalyst
is a water base **Nano-Titanium Dioxide**
contained solution”

Advantages:-

- When ITP Photocatalyst is irradiated by indoor or outdoor lighting, it can utilize the photo energy to decompose volatile organic compounds, odor, formaldehyde, bacteria and etc.
- Effective life around 1 to 3 years (depending on model) and up to 5 years for untouched area.
- No maintenance works required.
- Capable to coat on various surface.
